

## For You?

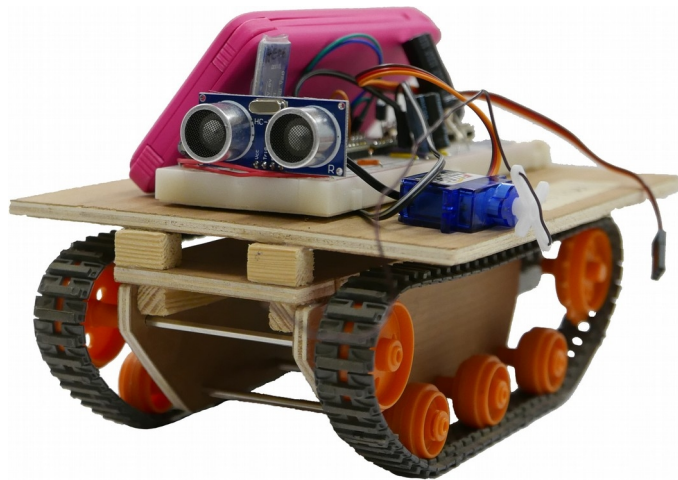

- You are between 16 to 21 years old
  - You are interested in Germany + German, talk in other languages or you like to build crazy things yourself
  - You want to make new friends + exchange ideas
- Previous knowledge is not necessary.

## What?

Fifty years ago, the first human visited the moon: A small step... To mark this anniversary, young people from Toulouse, a center of European space travel in the south of France, are inviting to visit the Station Weißwasser e.V.

Together we build remotely controllable and programmable lunar rovers made of wood, electronics and lots of creativity and test them in a "lunar landscape". Of course, it's also time to show our homeland and learn about France and Toulouse.

**You can take your Lunar Rover home and continue programming.**

## Where?

The House of Young Scientists in Weisswasser is a maker-space for children and grown-ups: Here, we observe the nature, paint, experiment and build a lot out of wood, metal and electronics.

In addition to cozy bungalows for overnight stays we have a wood and electronics workshop with many tools and materials available.

## When?

First week of the winter holidays 16.2. to 23.2. 2020

- Sun 17:30 arrival, getting to know each other
- Mon language exchange, motor assembly
- Tues chassis and the control computer
- Wed excursion Planetarium + University
- Thu continue building, night of stars
- Fri excursion Mine Coaling museum
- Sat 17:00 public presentation + party
- Sun departure in the morning
